

Follow these 7 steps to enable Hardware Acceleration in your browser settings.

1. Open Google Chrome.

2. Click the  icon in the upper-right corner.

3. Select **Settings** from the **drop-down menu**.

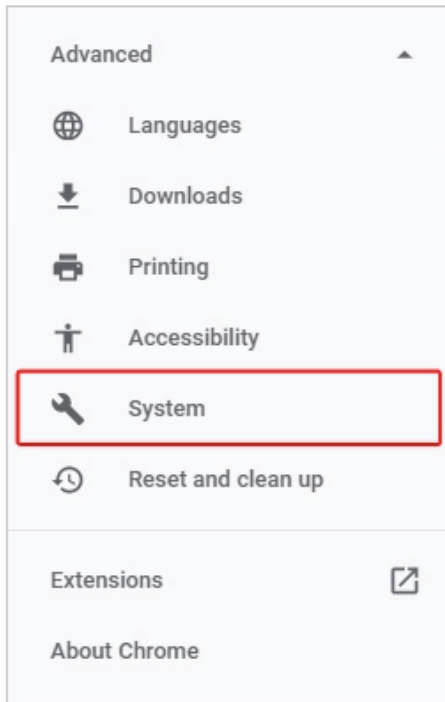

4. In the menu on the left side of the window, expand the **Advanced** menu.

STEP-BY-STEP GUIDE FOR CHROME BROWSER

5. Click **System**.

6. In the middle of the window, under *System*, click the **toggle switch** next to **Use hardware acceleration when available** to enable or disable hardware acceleration.

7. Once you've made your change, click the **Relaunch** button.
