

Follow these 7 steps to enable Hardware Acceleration in your browser settings.

1. Open Opera.

2. Click the  icon in the upper-left corner.

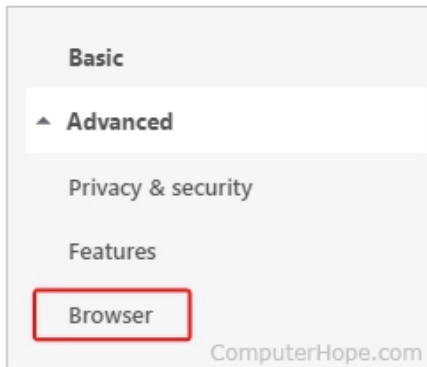

3. Select **Settings** from the **drop-down menu**.

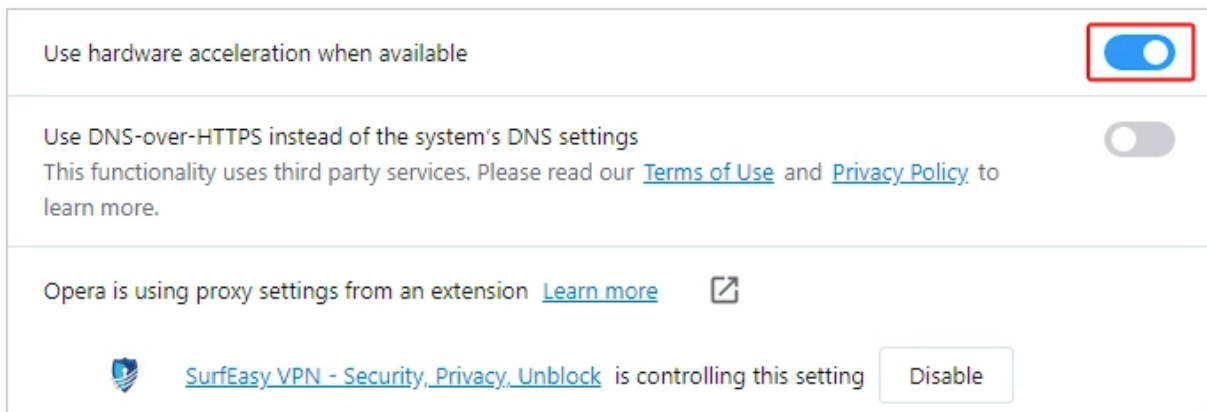

4. Click the  button.

STEP-BY-STEP GUIDE FOR OPERA BROWSER

5. Select **Browser** from the expanded menu.

6. Scroll down until you find the *System* section. Click the [toggle switch](#) next to **Use hardware acceleration when available** to enable or disable hardware acceleration.

7. When you've made your selection, click the [Relaunch](#) button.
